BEYOND ORGANIC

Choose
the best value
for your operation

IntraLight's Plug-and-play design enabling fast installation and low installation costs

Daisy-chaining system for easy and flexible layouts for any scale of production

Never pay material and labor costs for pesticide again at a negligible energy cost.

An advancement in the efficacy and cost of pesticidal treatment. IntraLight's proprietary low wavelength light technology damages the DNA of pests and pathogens, effecting equal or better pesticidal results when compared to traditional chemical methods. IntraLight's unique application method targets pest habitats on leaf undersides further effecting dramatic pesticidal results.

Gain competitive
advantage
with IntraLight's
proprietary tech

Maximize
your profits
minimize
Your expenses

Products grown with IntraLight demand a premium as the only effective zero contact organics on the market.

IntraLight effectively removes all material and labor costs associated with traditional pesticide solutions
